

School Safety: High-Quality Emergency Management Planning

SPOTLIGHT ON PIPELINES

This FREE interactive workshop takes an in-depth look at effective emergency management planning for schools in Texas. FEMA, the U.S. Department of Education and the Texas School Safety Center have developed guidelines to assist school districts with resources and tools to advance the development of multi-hazard emergency operations plans (EOPs).

During the workshop you will:

- ~ Be introduced to each of the sections and modules of the resources above, and gain a better understanding of processes involved in the development of EOPs
- ~ Explore specific annexes that should be included in your site-specific plans, including the new pipeline annex for Texas schools
- ~ Review and enhance your existing EOPs

Brought to you by the Texas Statewide School Pipeline Safety effort
